

Application No. 10/694,679
Docket No. 2003-0168.02
(58521.US/4665.0)

IN THE SPECIFICATION:

Please replace the paragraph on page 5, lines 1-6 with the following paragraph:

During a fluid ejection operation such as printing with an ink, an electrical impulse is provided from the controller to activate one or more of the ink ejection devices on the printhead 12 thereby forcing fluid through the nozzles holes 18 toward a media. Fluid is caused to refill ink chambers in the printhead 12 by capillary action between ejector activation. The fluid flows from a fluid supply ~~in~~ ink container 14 to the printhead 12.
